

Planisphera

Our Way of Operating

Planisphera's decisions and projects are guided by a framework of institutional integrity aligned with international standards, including the United Nations Global Compact, CEDAW, the IFC Performance Standards, and the UNDP Social and Environmental Standards (SES).

This framework establishes:

Robust ethical and socio-environmental safeguards, including the prevention of conflicts of interest and the integration of an intersectional gender perspective.

Clear governance and decision-making criteria that ensure technical independence, accountability, and traceability.

Operational protocols and quality standards that guide the responsible design, implementation, and evaluation of all projects.

Through this approach, we ensure that our work consistently reflects institutional coherence, technical rigor, and a strong commitment to the people, communities, and territories with which we engage.
